Interchange improvements at I-287 and Route 24

This project involves the widening of the Route 24 eastbound ramp and roadway approaches on I-287 southbound. The work will consist of widening the Route 24 structure (1421153) 3.3 meters over I-287 to the minimum two-lane ramp width of 9.6 meters. The project will also provide for the widening of the approach which will require approximately 375 meters of retaining walls.

# FY 2003 TRANSPORTATION CAPITAL PROGRAM

## New Jersey Department of Transportation Projects

<i>ROUTE/PROGRAM</i>	<i>Project ID Number</i>
287                      Truck Weigh Station, Bergen County	858

**Southbound Truck Weigh Station, Bergen County**

This project consists of construction of truck weigh and truck inspection facilities on the southbound side of I-287. It will weigh trucks destined for both I-287 southbound and NJ Route 17 southbound. The project includes weigh-in-motion scales, static weigh scales, paving, grading, drainage, utilities (relocation and new services), striping, electrical, lighting, and landscaping. The facility consists of internal roadways, approximately 40 parking stalls for trucks, twenty stalls for autos, an inspection building and pit, a control tower of approximately 10,000 square feet, salt storage barn for Local, County and State use, and expansion of the existing Mahwah composting/recycling area currently on the site. This project includes major improvements to the NJ 17/Stag Hill Road intersection including lengthening the acceleration lane onto Route 17 southbound. Stag Hill Road, between I-28 and Route 17 (less than 1 mile), will be widened to provide two eastbound lanes and one westbound lane (currently one lane each direction). A deceleration lane into and acceleration lane from the weigh station will need to be provided along I-287 southbound. The I-287 bridge over the Ramapo River will require widening to accept the acceleration lane from the weigh station.
